

## **Job Opening: Scientist, Immunology**

### **POTENZA Therapeutics, Inc., Cambridge MA**

Cancer therapy targeting immune checkpoints is demonstrating transformative anti-tumor activity in clinical use, and additional immune regulatory pathways are emerging with the expectation that therapeutics targeting these pathways will rapidly enter clinical development. POTENZA Therapeutics Inc. is an exciting biotech company, located in the heart of Cambridge MA, focusing on the development of novel biologic agents targeting the immune system for the treatment of cancer. We are currently seeking experienced immunologists to join our team.

### **Position**

The successful candidate will be an immunologist responsible for the design and execution of experimental work. He/she will have strong expertise in cellular immunology, immune checkpoints and/or T cell/NK cell biology. This individual will report to the Head of Immunology and will be responsible for the execution of project plans and timelines, evaluation of the biology of our targets, and running a variety of in vitro assays to support preclinical development of our portfolio molecules. H/she will be expected to thrive in a dynamic biotech environment.

### **Requirements**

- A Ph.D. in Immunology. Prior industry experience is a plus but not required.
- Expertise in cancer immunology and/or inflammation. Familiar with emerging new science and/or technologies.
- Experience in the drug development process from discovery stage to IND-enabling studies is a plus.
- Expertise in primary immune cell assays and mechanism of action studies.
- Excellent problem-solving skills for developing creative solutions and for maintaining timelines.
- Demonstrated ability to work as part of a team to execute experimental plans and deliver results is also necessary.
- Strong organizational skills.
- Strong written and oral communication skills are a must.
